

Apprenticeships

Co-op Academy
Bebington

March 2026

Dear parents and carers, this newsletter is focussed on apprenticeships because this time of year is a key time for job searching and apprenticeships. In the pages below you will find advice and tips to support your child.

Apprenticeship - job searching

Over the next few months you will start to see more suitable job opportunities being advertised on websites such as [Find an apprenticeship - GOV.UK](#) and [BeMore](#)

If you are supporting a young person to find an apprenticeship you could try looking at Training Providers and colleges too. Contact their apprenticeship teams and register your interest, they can then find you suitable vacancies. Here are some to try.

[The Engineering college](#)

[Apprenticeships Cheshire College South & West](#)

[Wirral Met apprenticeships](#)

[Access industry](#)

Students should register on [Find an apprenticeship - GOV.UK and](#) create an account and then they can start applying for suitable apprenticeships when they open. There is a list of vacancies at the end of this document which are open now for applications.

Applications

Applications for apprenticeships are very competitive and there are not as many available as you would think. The application process can include application forms, CVs, video interviews and assessment centres so it is important that year 11 students have also applied to college or sixth form as a back up. These links have some resources and information to help.

Events

We are pleased to let you know that EET Fuels will be hosting an Apprenticeship Open Evening at Stanlow on 1st April The event is designed to give prospective applicants and their families an insight into the exciting apprenticeship opportunities available at EET Fuels. All event details, including registration, can be assessed by visiting the link [EET Open event tickets](#)

Next Steps

If your child is interested in an apprenticeship, please encourage them to:

1. Search for Roles: Keep checking [Find an apprenticeship - GOV.UK](#) and [Apprenticeship Vacancies - BeMore](#)
2. Prepare their Application: A CV and cover letter are essential. Templates are available on their Google Classroom and the links above.
3. Local Opportunities: Look out for Cammell Laird apprenticeships, which typically open in Spring (around May)
4. Get Support: Students keen to apply are encouraged to come and see me for guidance in F13 on Monday lunch times.

Apprenticeships open for applications now

Here are some apprenticeships open for applications now but starting in August or September. They are all advertised on <https://www.gov.uk/apply-apprenticeship> and application details are on the links
